

Employee Benefits in 5 Easy Steps

Setting up your employee benefits marketplace is easy. After creating your group account, employees make their own health coverage and other benefit plan choices and then you and your employees administer the program - all from a user friendly web portal.

1

Review plans, pricing, and compare costs. As a multi-carrier private insurance exchange, you can provide a Fortune 500 level benefits offering from leading insurance companies and let your employees choose the plans that best fit their needs.

Employer

2

Set a monthly benefits allowance and establish payment options. You budget and decide how much to spend on benefits using a defined contribution approach and decide if you want to facilitate the premium payments or hand that duty off to your employees.

Employer

3

Start enrollment. Notify employees. The exchange sends personalized email notifications to each eligible employee with enrollment instructions, educational content, and helpful videos about their benefits.

Employer

4

Shop for benefits. Each employee logs into their account and uses interactive decision support tools to make more informed benefit decisions. Employees also have access to live support from licensed Benefits Counselors.

Employees

myCIGNA Health Flex 5500 (Bronze)	Your Premium per month	Your Personalized Estimates
	\$4713	Total Cost per month: \$4713
	Out-of-Pocket per month: \$0.00	

5

Manage your benefits and automate renewals. Employers and employees can access the exchange to manage their benefits. Annual renewals are handled automatically through the exchange which makes the process quick and easy for you and your employees.
